

## Customized ticketing solution.....

### COMPACT MOTORIZED BARCODE READER

#### MOTORIZED BAR CODE READER (LCBM)

- Motorized reader in a compact size
- Laser Bar Code Scanner or QR scanner
- Ticket capture.
- RS232 interface.

#### MOTORIZED BAR CODE READER AND PARKING MODULE (LCBM AP)

- Motorized reader in a compact size.
- Laser Bar Code scanner or 2D QR scanner
- Ticket capture.
- Parking module, allow to manage 2 tickets at the same time inside the reader.
- RS232 interface.

### What is different:

Our flexible system allows our adaptation to the different configurations our clients could need from only one magnetic head to some of them with chip card or bar code processing.

Our print system allows the using of an impact printer or thermal printer. Our terminals are used in highways, parking, ticket sales, etc...

#### FLEXIBILITY

- Evaluation of product customization to customer needs.

#### TECHNICAL SUPPORT

- Our own development, allows us to give the best technical support.

#### GiTEC

• Specialized in Ticket and Payment Solutions

## MOTORIZED BAR CODE READER (LCBM)

**Power Supply: 24 Vdc**

**Power Consumption:**

- Stand by: 200 mA máx.
- Operation:
- Starting Peak :> de 5 Amp durante 10 mS.

**Ticket Issuing Speed:**

Encoding with no verification: aprox. 1,7 seg.

Encoding with verification: aprox. 2,6 seg.

Operation temperature : 0° a +50°

Storage temperature: -20° a +60°

Humidity (no condensation): 20% a 80%

## MOTORIZED BAR CODE READER AND PARKING MODULE (LCBM AP)

**Power Supply: 24 Vdc.**

**Power Consumption:**

- Stand by: 200 mA máx.
- Operation (encoding & printing): 1,6 Amp (tip.)
- Starting: > de 5 Amp durante 10 mS.
- Recommended Power: 100 W

Operation temperature : 0° a +50°

Storage temperature: -20° a +60°

Humidity (no condensation): 20% a 80%
